Education

NBN Sinhgad School of Engineering, Pune

2022 – 2026

Bachelor of Engineering in Information Technology | Savitribai Phule Pune University | CGPA: 7.68/10

Experience

Zeta-V Technology Solutions Ltd.

Jan 2026 – Jun 2026

Software Engineering Intern

- Completed Salesforce Administrator training (**34,000 Trailhead points, 4 Superbadges, 34 badges**) and built an **HR Operations & Recruitment Platform** on Salesforce Sales Cloud using custom objects, reports, dashboards, validation rules and access settings.
- Built a **web scraping pipeline** using Playwright and Chromium for automated tender data collection, and prepared project planning presentations to align technical scope with delivery timelines for stakeholders.

Code4Bots Pvt. Ltd.

Feb 2025 – Apr 2025

AI Research Intern

- Researched AI adoption opportunities for companies such as Zomato and Zerodha, producing in-depth case studies to identify high-impact automation areas, and designed the core workflow architecture and working demo for a client-tailored enterprise AI system, presenting findings via a **100-slide research presentation**.

Projects

Parchify – AI-Powered Invoice Processing Platform

Final Year Capstone | Team Lead

- Built **Parchify**, an online web application that processes messy, unstructured invoices and converts them into validated, ready-to-use data exportable in **Excel, JSON and PDF** for direct upload into accounting software such as **Tally and Zoho Khata Book**, using **Google Document AI, OCR, canonical schema modeling and automated financial validation** – achieving **94.3% OCR accuracy, 91.2% field-extraction F1-score and 88.5% automated validation**, reducing manual review to **11.5%** with minimal human intervention.
- Automated the end-to-end pipeline with auto email-based invoice fetching and a pre-validation scoring system that flags errors such as blank fields and mismatched totals via auto-summing checks; built the application using **React.js, Tailwind CSS, Python/FastAPI and SQLite**.

HR Operations & Recruitment Platform

Salesforce Sales Cloud

- Built an HR and recruitment management application enabling HR teams to **schedule interviews, manage candidate information, and track internal company activities** through custom objects and employee-focused page layouts.
- Designed **dashboards, automated reminders and expense reports**, along with validation rules and role-based access controls, to maintain secure, consistent HR data and give leadership real-time visibility into recruitment and employee operations.

Publication

Vendor-Agnostic Invoice Processing Framework Integrating OCR, Canonical Modeling, and IJCA, 2026
Human-in-the-Loop Validation

Co-authored a research paper formalizing the invoice-processing framework built as part of **Parchify**, which I led as team lead – covering OCR-based text extraction, canonical data modeling for cross-vendor invoice formats, automated financial validation logic, and a human-in-the-loop review workflow for low-confidence fields. The paper documents the system architecture and validation methodology behind the project's reported accuracy and automation benchmarks.

Skills

Programming: Python, Java, JavaScript, SQL

Web Development: React.js, HTML5, Bootstrap, Tailwind CSS, FastAPI

Salesforce: Salesforce Administration, Apex, Lightning Components, Flows, Process Builder, Reports & Dashboards

AI & Automation: Machine Learning, OCR, Google Document AI, Generative AI

Data & Analytics: Pandas, NumPy, Matplotlib, OpenPyXL, Tableau, Data Validation, Business Reporting

Certifications

• Microsoft Azure Fundamentals (AZ-900) – 985/1000

• The AI Engineer Course 2026: Complete AI Engineer Bootcamp – Udemy (2026)
