## WORK EXPERIENCE

### Software Engineering Intern Zeta-V Technology Solutions Ltd.

Jan 2026 – Jun 2026

- Underwent 4 months of Salesforce Administration training and used it to build a Recruitment Management application on Sales Cloud, including custom objects, reports, dashboards, validation rules, and access settings.
- Completed 34,000 points on Salesforce Trailhead, including 4 Superbadges and 34 badges, alongside the internship.
- Worked on the frontend for a website revamp project and helped with backend routing.
- Built an automated LinkedIn analytics reporting pipeline in Python (pandas, NumPy, Matplotlib, openpyxl, xldr) that cleans raw exports, auto-detects file formats and sheet structures, and generates a standardized set of executive charts trend lines, monthly comparisons, demographic breakdowns, and KPI summaries each exported as matched 600-DPI PNG/SVG pairs ready to drop into PowerPoint.
- Took ownership of parts of the project independently planning tasks, setting timelines, and picking up basic project management along the way.

### AI Research Intern

Feb 2025 – Apr 2025

#### Code4Bots Pvt. Ltd.

- Part of a team assigned to research companies like Zomato and Zerodha studying how they currently operate and where AI could realistically fit in.
- Put together a 100-slide presentation covering the research and recommendations for these companies.
- Developed an initial working demo and core workflow architecture for a client-tailored AI model, translating early-stage concept ideas into a functional prototype.
- Picked up a lot about research, presenting findings clearly, and the basics of AI architecture design.

## KEY PROJECTS

### Parchify AI-Powered Invoice Processing Platform

Final Year Capstone | Team Lead, 3 members

- Built an invoice digitization platform that uses Google Document AI and OCR to extract data from both printed and handwritten invoices, removing the need for fixed templates.
- Added an image preprocessing step (deskewing, cropping, noise reduction) before OCR to improve extraction accuracy on lower-quality scans.
- Designed a validation layer using confidence scoring, so low-confidence fields are flagged for manual review instead of being accepted blindly reduced the chance of bad data going through unchecked.
- Built the frontend in React.js and Tailwind CSS, with a Python/FastAPI backend and SQLite for storage; supported export to Excel, PDF, and JSON.
- Co-authored a research paper on the framework, published in the International Journal of Computer Applications (2026).
- Built a vendor-agnostic invoice processing pipeline (Google Document AI OCR → canonical schema → arithmetic/tax validation) achieving 94.3% OCR accuracy and 91.2% field extraction F1-score, with 88.5% of invoices passing automated validation reducing manual review to 11.5% of volume. Published, IJCA 2026.

### Salesforce Administration & ATS Management App

- Built an HR Management application on Salesforce Sales Cloud during a 4-month Salesforce Administration training program, using custom objects and page layouts suited to employee data.
- Created reports and dashboards to track HR metrics, along with validation rules and role-based access to keep data consistent and secure.
- Gained hands-on experience with Salesforce's declarative tools a solid base for picking up Apex and Lightning Components next.

## PROFESSIONAL SUMMARY

Final-year Information Technology student with hands-on experience in AI-based document processing, including a published pipeline (IJCA, 2026) integrating OCR, canonical schema design, and automated financial validation achieving 91%+ field extraction accuracy. Proficient in Python and applied machine learning, with a strong emphasis on accuracy, data integrity, and systematic problem-solving.

## EDUCATION

### B.E. Information Technology

NBN Sinhgad School of Engineering, Pune  
Savitribai Phule Pune University  
2022 – 2026 | CGPA 7.68/10, First Class

## SKILLS & KNOWLEDGE

### Web Development

React.js, Node.js, HTML5, Bootstrap

### Salesforce

Administration, Apex, Lightning Components, Flows, Process Builder, Reports & Dashboards

### Languages

Python, Java, JavaScript, SQL

### AI & Automation

Machine Learning, OCR, Document AI, Generative AI, UiPath

### Data & Analytics

SQL, Tableau, Data Validation, Business Reporting

### Cloud Platforms

Microsoft Azure, Oracle Cloud Infrastructure (OCI)

## CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) 985/1000
- The AI Engineer Course 2026: Complete AI Engineer Bootcamp Udemy (2026)
- Oracle Cloud Infrastructure AI Foundations Associate
- OCI's AI/ML services & cloud application design

## PUBLICATION

### Vendor-Agnostic Invoice Processing Framework Integrating OCR, Canonical Modeling, and Human-in-the-Loop Validation

International Journal of Computer Applications (IJCA), 2026
