SUMMARY

Information Technology undergraduate with hands-on experience in Salesforce Administration, AI-driven automation, and full-stack web development. Currently working as a Software Engineer Trainee with practical exposure to Salesforce configuration, Apex development, data management, reporting, and workflow automation. Experienced in building AI-powered solutions using Python, SQL, OCR technologies, and cloud platforms including Microsoft Azure and Oracle Cloud Infrastructure. Published research author with a strong foundation in problem-solving, software development, and emerging AI technologies. Passionate about leveraging technology to create scalable business solutions and drive digital transformation.

WORK EXPERIENCE

Software Engineering Intern

January 2026 – June 2026

Zeta-V Technology Solutions Limited

- Completed 4-month Salesforce Administrator training configured users, roles, profiles, and permission sets; customized objects and built Lightning components with Apex to automate manual processes.
- Used Python to clean and validate 500+ Salesforce records, improving data accuracy; built reports and dashboards to support decision-making.
- Built responsive UI components using React.js and Bootstrap, and supported backend features with Node.js as part of a full-stack team.
- Collaborated with senior developers in an agile environment on project planning, code reviews, and troubleshooting.

AI Research Intern

February 2025 – April 2025

Code4Bots Pvt. Ltd.

- Researched workflows of companies including Zomato and Zerodha to identify AI-driven automation opportunities.
- Co-designed enterprise-specific AI copilots tailored to client business processes.
- Authored research documentation covering AI implementation strategy, workflow impact, and feasibility analysis for multiple enterprises.

EDUCATION

B.E. – Information Technology

2022 – 2026 | CGPA: 7.68/10

NBN Sinhgad School of Engineering, Pune

(First Class)

Savitribai Phule Pune University, Pune

Affiliated with Savitribai Phule Pune University

KEY SKILLS

- Programming Languages:** Python, Java, JavaScript, SQL
- Web Development:** React.js, Node.js, HTML5, CSS3, Bootstrap, Tailwind CSS
- Salesforce:** Administration, User & Role Management, Profiles & Permission Sets, Apex, Lightning Components, Reports & Dashboards
- AI & Data:** Machine Learning, OCR, OpenCV, Document AI, Tableau, Data Analytics
- Cloud Platforms:** Microsoft Azure, Oracle Cloud Infrastructure (OCI)
- Automation:** UiPath, Process Automation, Workflow Optimization
- Tools:** Git, VS Code, Android Studio, UiPath Studio

PROJECTS

1. Parchify – AI-Powered Invoice Processing Platform (Final Year Project)

- Led a 4-member team in designing and developing an AI-powered invoice digitization platform as the Final Year Project, integrating OCR, automation, and document processing technologies.
- Implemented OCR and image preprocessing techniques using OpenCV and Google Cloud Vision API to accurately extract vendor details, invoice dates, line items, and totals from invoices.
- Designed a human-in-the-loop validation workflow that enabled users to review and correct extracted information before final submission, improving data accuracy and reliability.
- Integrated a SQL database for secure storage, management, and retrieval of invoice records.
- Developed automated export functionality for generating Excel and PDF reports, streamlining business documentation processes.
- Reduced manual invoice processing efforts by automating data extraction, validation, and record management workflows.

2. Salesforce Administration & CRM Management System

- Technologies: Salesforce Administration, Apex, Lightning Components, Reports & Dashboards
- Configured users, roles, profiles, permission sets, and sharing settings to ensure secure access control.
- Customized standard and custom objects, fields, page layouts, validation rules, and workflows based on business requirements.
- Developed Apex classes and triggers to automate business processes and improve operational efficiency.
- Built Lightning Components and customized user interfaces to enhance user experience.
- Created reports and dashboards for real-time business monitoring and data-driven decision-making.
- Performed data import, cleansing, validation, and maintenance activities to ensure data integrity.
- Implemented automation using Flows and Process Builder to reduce manual effort and improve productivity.

3. GenAI Content & Post Generator

- Technologies: JavaScript, HTML5, Tailwind CSS, Groq API, Llama 3.1, jsPDF
- Developed a Generative AI-based web application capable of analyzing writing styles and generating personalized content.
- Integrated Groq API with Llama 3.1 to create high-quality social media and professional posts.
- Implemented advanced prompt engineering techniques to improve content relevance and writing consistency.
- Developed an intelligent topic recommendation engine based on previous user-generated content.
- Provided customization options for content tone, writing style, and post length.
- Integrated PDF export functionality for easy content sharing and documentation.

RESEARCH PUBLICATION

Vendor-Agnostic Invoice Processing Framework Integrating OCR, Canonical Modeling, and Human-in-the-Loop Validation

International Journal of Computer Applications (IJCA), 2025

- Authored and published research on an intelligent invoice processing framework combining OCR, canonical data modeling, and human validation techniques.
- Proposed a vendor-independent approach for extracting and standardizing invoice data from diverse document formats.
- Enhanced data accuracy and reliability through a human-in-the-loop validation mechanism for financial document processing.
- Demonstrated practical applications of AI-driven document automation for business workflow optimization.

CERTIFICATIONS & ACHIEVEMENTS

Certifications & Achievements

- Microsoft Azure Fundamentals (AZ-900) Certified – Scored 985/1000
- Oracle Cloud Infrastructure 2025 AI Foundations Associate Certified
- IBM SkillsBuild Artificial Intelligence Fundamentals Certified
- Published Research Paper in the International Journal of Computer Applications (IJCA) on Intelligent Invoice Processing and Automation
- Salesforce Administration Training with practical exposure to Apex Development and Lightning Components

PERSONAL INTERESTS

Interests

- Artificial Intelligence & Emerging Technologies
- Cloud Computing
- Tennis & Sports Analytics
- Automation & Digital Transformation
- Software Product Development
